

Teacher of Science (Chemistry or Physics preferred)

Closing date: Monday 11 February 9.00am

Interviews: Thursday 14 February

We are looking to appoint a teacher of science to join a successful department and a cohesive team. This position would suit a newly qualified or experienced teacher. We are a school where students are eager to learn and readily get involved in extra curricular activities. Staff and students are highly ambitious but down to earth, approachable and honest.

It is an exciting time to join our school and our latest OFSTED inspection has acknowledged how proud we should be of our achievements and that staff morale is high.

We do have high expectations of staff and students, but we also expect them to be individuals who demonstrate a strong work ethic, kindness and decency at every level. This is because we want all students to make really good progress and leave school with wonderful memories of their experiences. We want our staff to enjoy their work and really see the value in what they do. In return we seek every opportunity to develop staff. We expect an open mind and that staff take ownership of continually developing their own practice, try new things out but also not shy away from traditional methods that are proven to work.

The school is situated in Auckley near Robin Hood Airport. It is a lovely part of Doncaster and really easy to get to and from. Our teachers come from as far away as North Leeds, Sheffield, Scunthorpe and Nottinghamshire. It really is worth the journey. We like living in this area because there is plenty to do and lots of open space.

If you are interested in applying please go to our website and download the application documents and further information. You are very welcome to visit the school before you apply and find out if you think you would fit in.

Please contact our HR Manager, Paula Kynman, 01302 770589, pkyn@thehayfieldschool.co.uk.

We look forward to receiving your application.

We are committed to safeguarding and promoting the welfare of our students and an Enhanced DBS check will be required for this post. We aim for diversity within our workforce.
